Subject: Re: Reminder: Kick Plate for LSJ MC Kitchen today

Date: Tue, 28 May 2019 12:40:50 +0000

Please be advised that I did a walk through after the three hours of soaking rain we received yesterday. I happened to notice water on the kitchen floor. It was coming from a drip under the sink. I mopped up what I could reach. Michael is aware. I asked him to send Danny this morning to pull out the dishwashers and see if water is up under the cabinets as this water seemed to be dripping through the back of the cabinet into the center of the island where we cannot see and seeping out from the bottom of the cabinet. Mike and I concur it is probably sprung from the added water pressure from the new pump installs. I shut the line off under the sink where the leak seemed to be. Please have Sylvester pull the dishwashers out and have them check up under there for water and dry everything out.

Sylvester is working on the Kitchen cabinet & kick plate at the moment.

Sylvester said it's not just the kick plate.
He said the whole cabinet have to change completely before the kick plates go on.
