---

Jeffrey

Appears you are set for S76D demo to Islip  
Depart East 34st NYC Heli Pad at 11am

Eric has been briefed and will be ready for your arrival,,  
Jeanette Eaton who the Regional sales manager for Sikorsky will join you on the demo flight, she has met you in the past, and is the reason we were able to schedule this demo flight.

---

Here is a message from David Peterson

Larry:

We should be all set. I will reconfirm and advise shortly. We will be flying him in one of our dedicated demonstrator aircraft (D19). This aircraft has about 200 hours on it and is exquisite. He should get a superb ride and nice quiet conversation on his trip. This is the same aircraft we showcased in our booth at Heli-Expo this year.

This demonstrator is logically for sale (although we do not like to release them, we always cave when the aroma of cash is in the air, so I'd rather it went to a good customer in my region than somewhere else). I figure tomorrow's flights are really about helping him establish a vision of a pathway forward that he can use the C++ as a stepping stone toward, but then again, as you already know, you just never know. So, in case he does express interest in this particular S-76D and all of the latest technology that comes with it, I have attached a brochure about it specifically, so you can see what it looks like inside and out, as well as other details. Asking price on this aircraft is \$13.24M, but we have typically been selling similar vintage demonstrators last year in the low \$12M's. As we previously discussed, since the offshore oil business is still so flat, there is great opportunity to be found for those who can leverage cash and potentially be the first to close on even better pricing.

Due to a schedule change on an equally urgent matter, I am very disappointed to say that I am going to have to deviate from participating tomorrow and rush to help another customer, but only after I choreographed with Jeanette where she will cover for me. She obviously knows you and had previously met Mr. Epstein, so she was thrilled to be able to be part of the solution so we could handle these two urgent and overlapping events. My apology for not being able to get together with you tomorrow, but I may be able to catch up with you later in the day, or maybe on Thursday, or Friday, if you are still in the area.

Hello David, do you think we are all set for tomorrow at 11 AM for pickup at E34st NYC Pad?  
Just checking in with you, we just landed in TEB

Keep me posted

Thx  
Larry

Hi [REDACTED]:

It appears that the Islip Airport is about 55 miles from East 34th Street Heliport. That makes it about a 20-25 minute flight each way. If you figure that he needs to be on the ground for roughly a 1 hour meeting, that makes the entire trip roughly about 2 hours, or so.

Larry:

Looks like we are able to accommodate the flight from East 34th Street to Islip; plan to be on the ground for 1 hour; then return to East 34th Street; on Wednesday 6/12. Does Mr. Epstein have a preference for the time of day? We should be able to accommodate either morning, or afternoon, so just let us know. I will need to be onboard, do you intend to participate as well? Whom besides Mr. Epstein would be on this planned flight?

Dave

Hi Jeanette and David,,

Yes Jeanette,, I'm still working for the same guy,,, 29 years,,, darn,, I met you when we flew B407's....

Yes we are closing on 760750 next week C++,,, however, my boss is

very interested in the Ride of the D model,,, we are selling our

430 and replacing it temp with a C++,,,I hope David could work

out a Demo for Wed if possible,,, David, Any time in the morn or

afternoon on Wednesday is fine according to Mr Epstein, Keep me

posted

Thx

Hello David and Jeanette,

Good to hear back,, keep me posted about S76D demo availability...

I arrive in TEB tomorrow at 6pm in the G550,,,, I will be in NY

all week,, hopefully at AAG later,, if you put together the

Demo, I will join Mr Epstein on the flight Look fwd to hearing

back from you

Thx

Larry:

Just picking up your e-mail now. My apology, but I did not receive a text from you (my mobile is [REDACTED]). I was traveling all day on Friday and then simply forgot to check e-mails on Saturday. It would have been great to see you as late morning Friday through mid-afternoon I was right across the river from you at Stewart Airport and could easily have stopped over at AAG to see you. The cell phone I show for you is [REDACTED] (is this correct?).

Regardless, thanks for expressing interest once again in a demo of the S-76D that we had previously discussed. Very glad to hear that he has interest. When I didn't hear back from you on the last attempt, I was worried that he may have not have been interested since he was getting into the C++. Mr. Epstein will not be disappointed in the S-76D ride. It is THE best of any helicopter in the world and substantially better than the C++, especially at 155kts, as well as going through ETL. I will check into the potential availability of the D for this week on either 6/12, or 6/13 from East 34th to Islip back to East 34th and we'll see what we can work out. Do you know what time of the day this would be held?

Jeanette's e-mail is [REDACTED] and I have CC'd her above for her and your SA. Thanks for the new request. We'll see what we can do.

Dave

Subject: EXTERNAL: S76D demo for Mr Epstein

Good morning David,

Not sure if you received my text yesterday, I'm currently at AAG with our Heli., accomplishing blade tracking.

my principal Mr. Jeffrey Epstein is very serious about doing a demo flight in your S76D model, I finally got an exact date and mission if you could accommodate?

either June 12th or June 13th he would like to be picked up at NYC Heli Pad and fly to Islip airport for and Hour Visit At Islip airport and return to NY City Heli pad, maybe the East side NYC pad?

this is one of his regular flight profiles.

Can you check if you could accommodate this demo? We close on  
our

S76C++ late next week as well, Mr Epstein is very curious to  
experience the ride characteristics on the S76D model.,

Also, what is Jeanette Eaton's email address, I've known her  
for many years back in her Bell helicopter days as well as  
Sikorsky,

Pls advise,

Many thx in advance,

Larry Visoski
