Subject: Re: Granite

Hi. It's actually the same granite I picked for Bay Head. It's from Brazil and the mountain has almost been "mined out" so it's hard to find. Several sites categorize it as a type of Quartzite and it goes by many names. It's the closest in looks to carrera marble so it's well above standard grade in price. I think my piece was called moon light. Hope this helps. Love,=
