

*Do you trust in today's technology?*

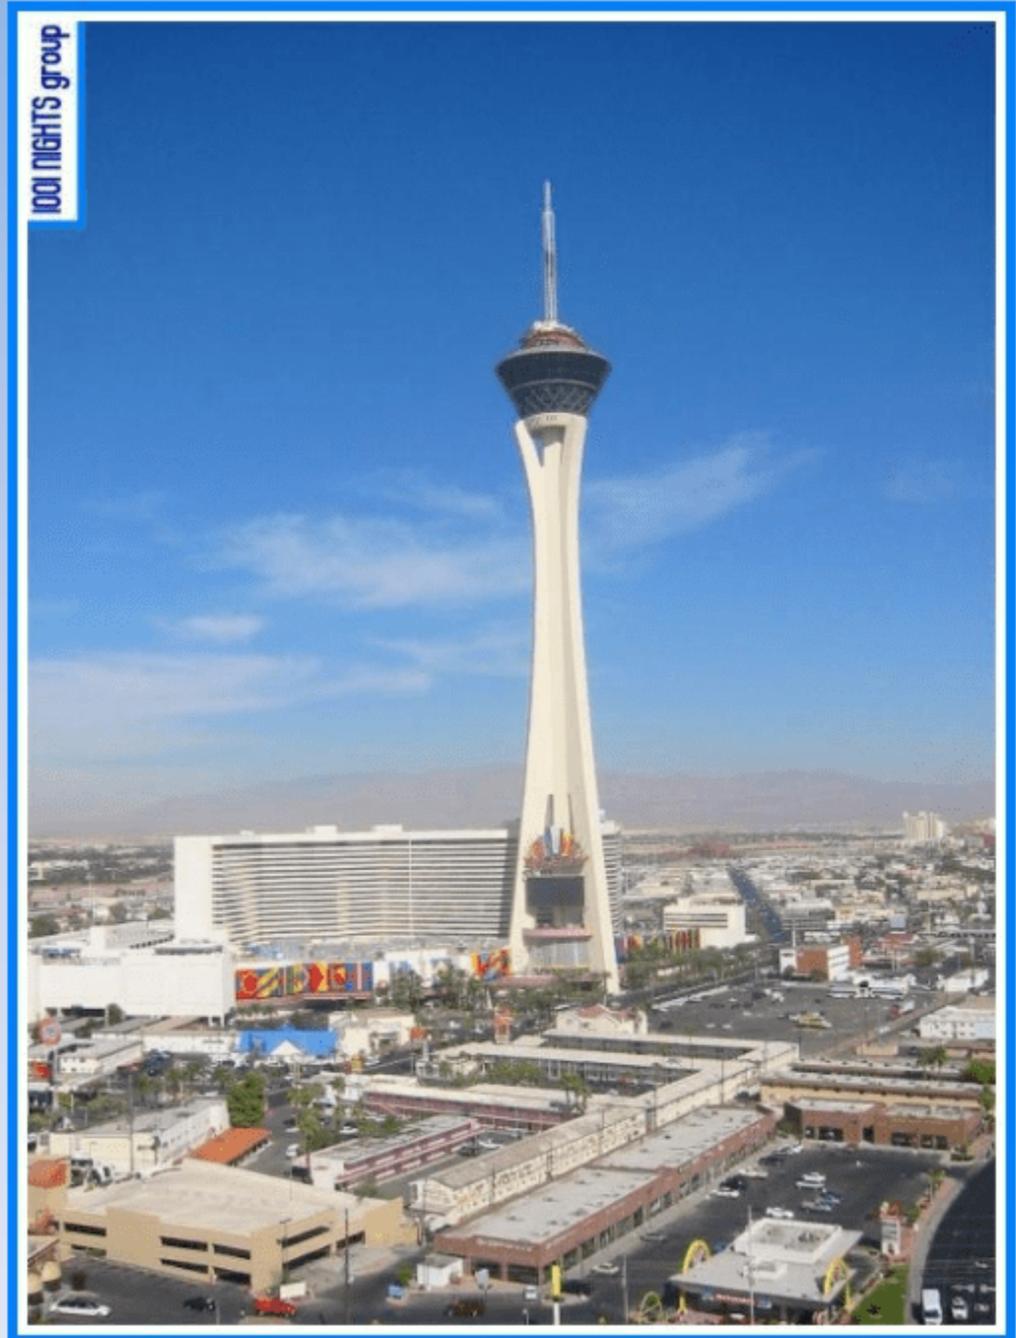

What you are seeing is the  
Stratosphere.

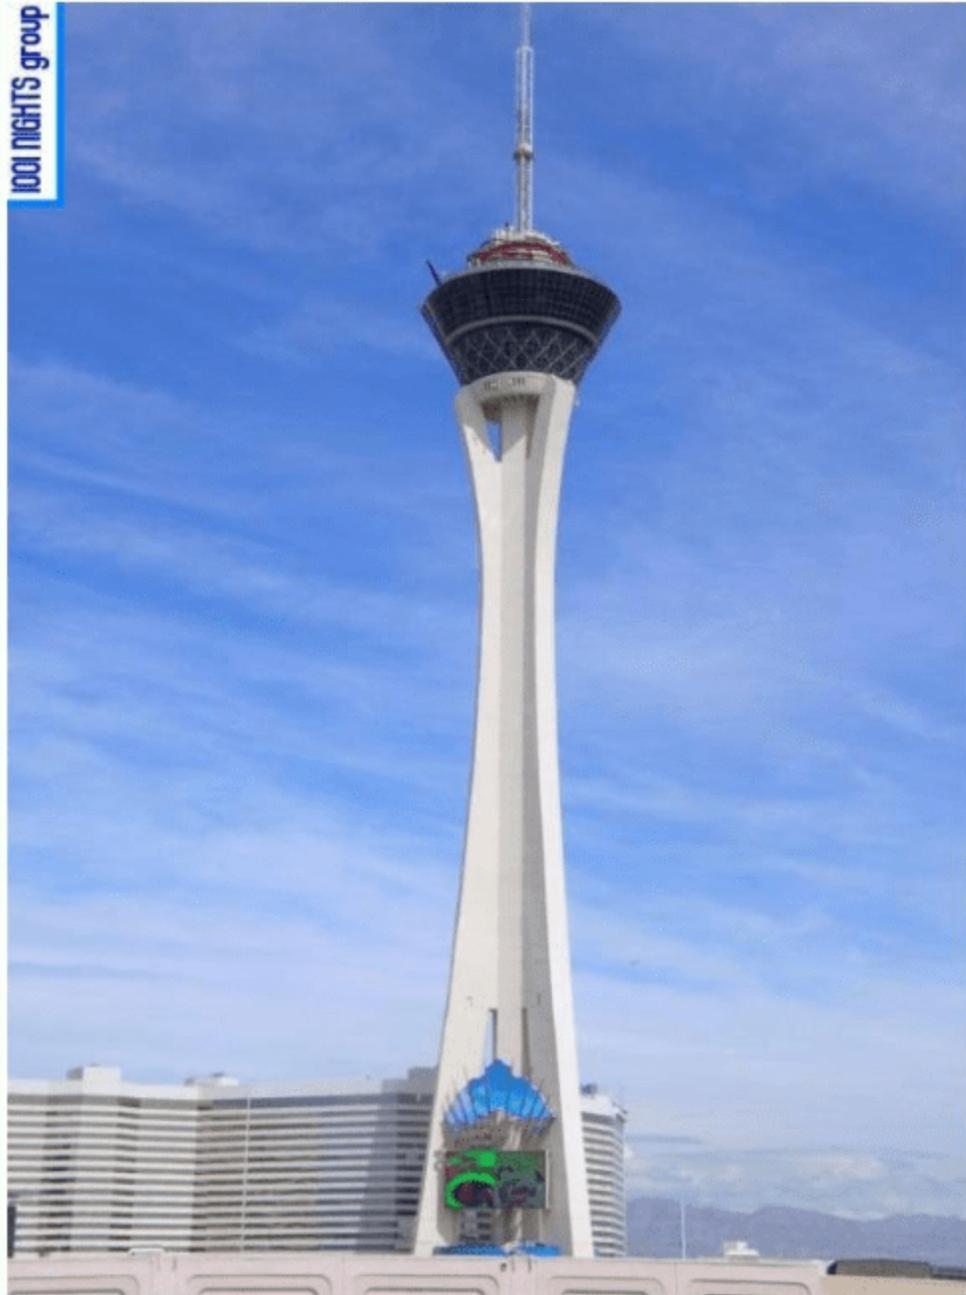

This is a hotel of the city of Las Vegas.

Las Vegas is full of hotels and  
casinos with the most exotic  
architectural forms.

But give it another look!

Do you see anything  
extraordinary?

Closer.....

The Tower is 350 meters high,  
equivalent to 110 floors.

It's a panoramic tower!

We see below, Brasil Telecom Tower in the city of Curitiba. It is 110 meters tall.

1001 NIGHTS group

But the tower that we see here is special...

What strange thing is that at the top of the building?

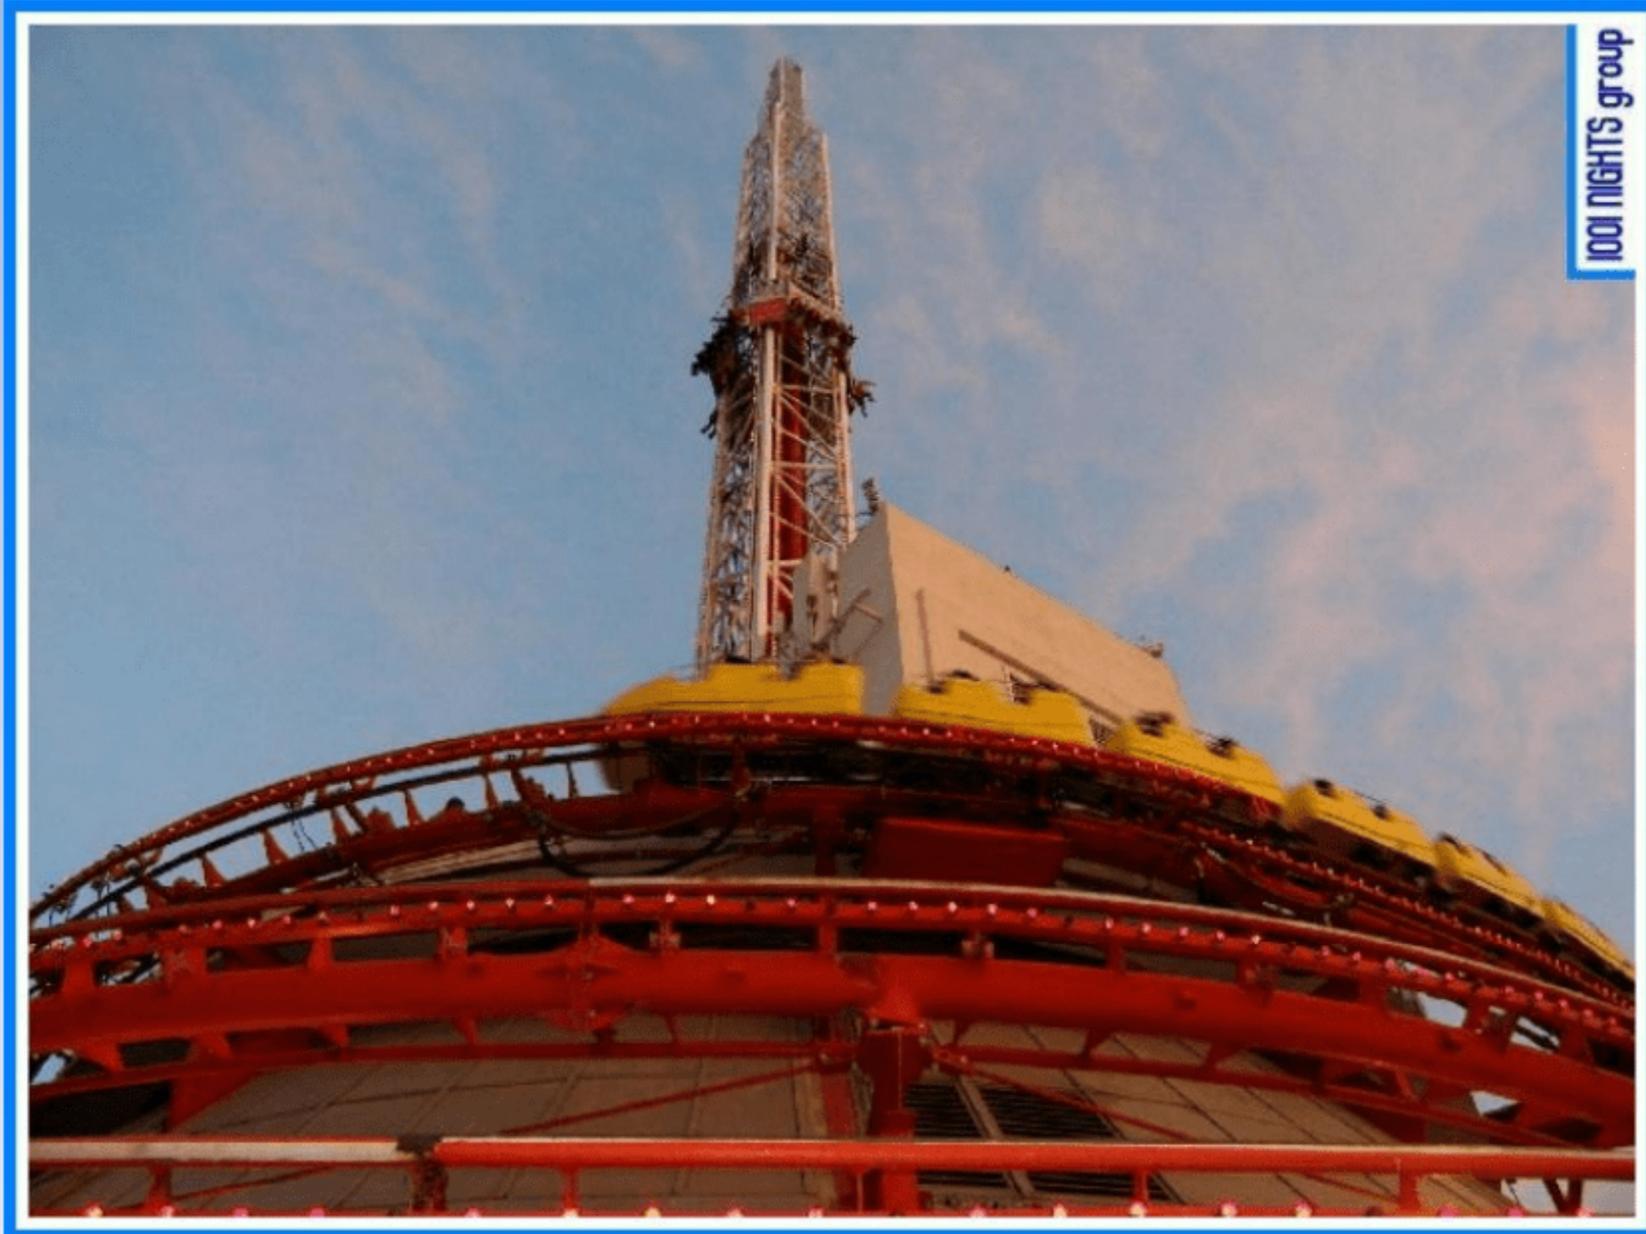

YES – you are right!

An amusement park with four of those "toys" normally found in parks on the ground?

... It is a rollercoaster -- at the top of the tower!

1001 NIGHTS group

A second “fun ride” is an elevator, which rises to the top and then descends, making people feel the effect of up to four times the gravitational force!

1001 NIGHTS group

The other "fun ride"  
is sort of a corridor.

It "simulates" as if  
it's going to go into  
space.....but it  
stops at the last  
minute.

1001 NIGHTS group

And now the last one.....  
People sit on the chairs and see what happens....  
The whole unit begins to rotate at high speed.  
The effect of the centrifugal force causes the mechanism to start to open up and...

1001 NIGHTS group

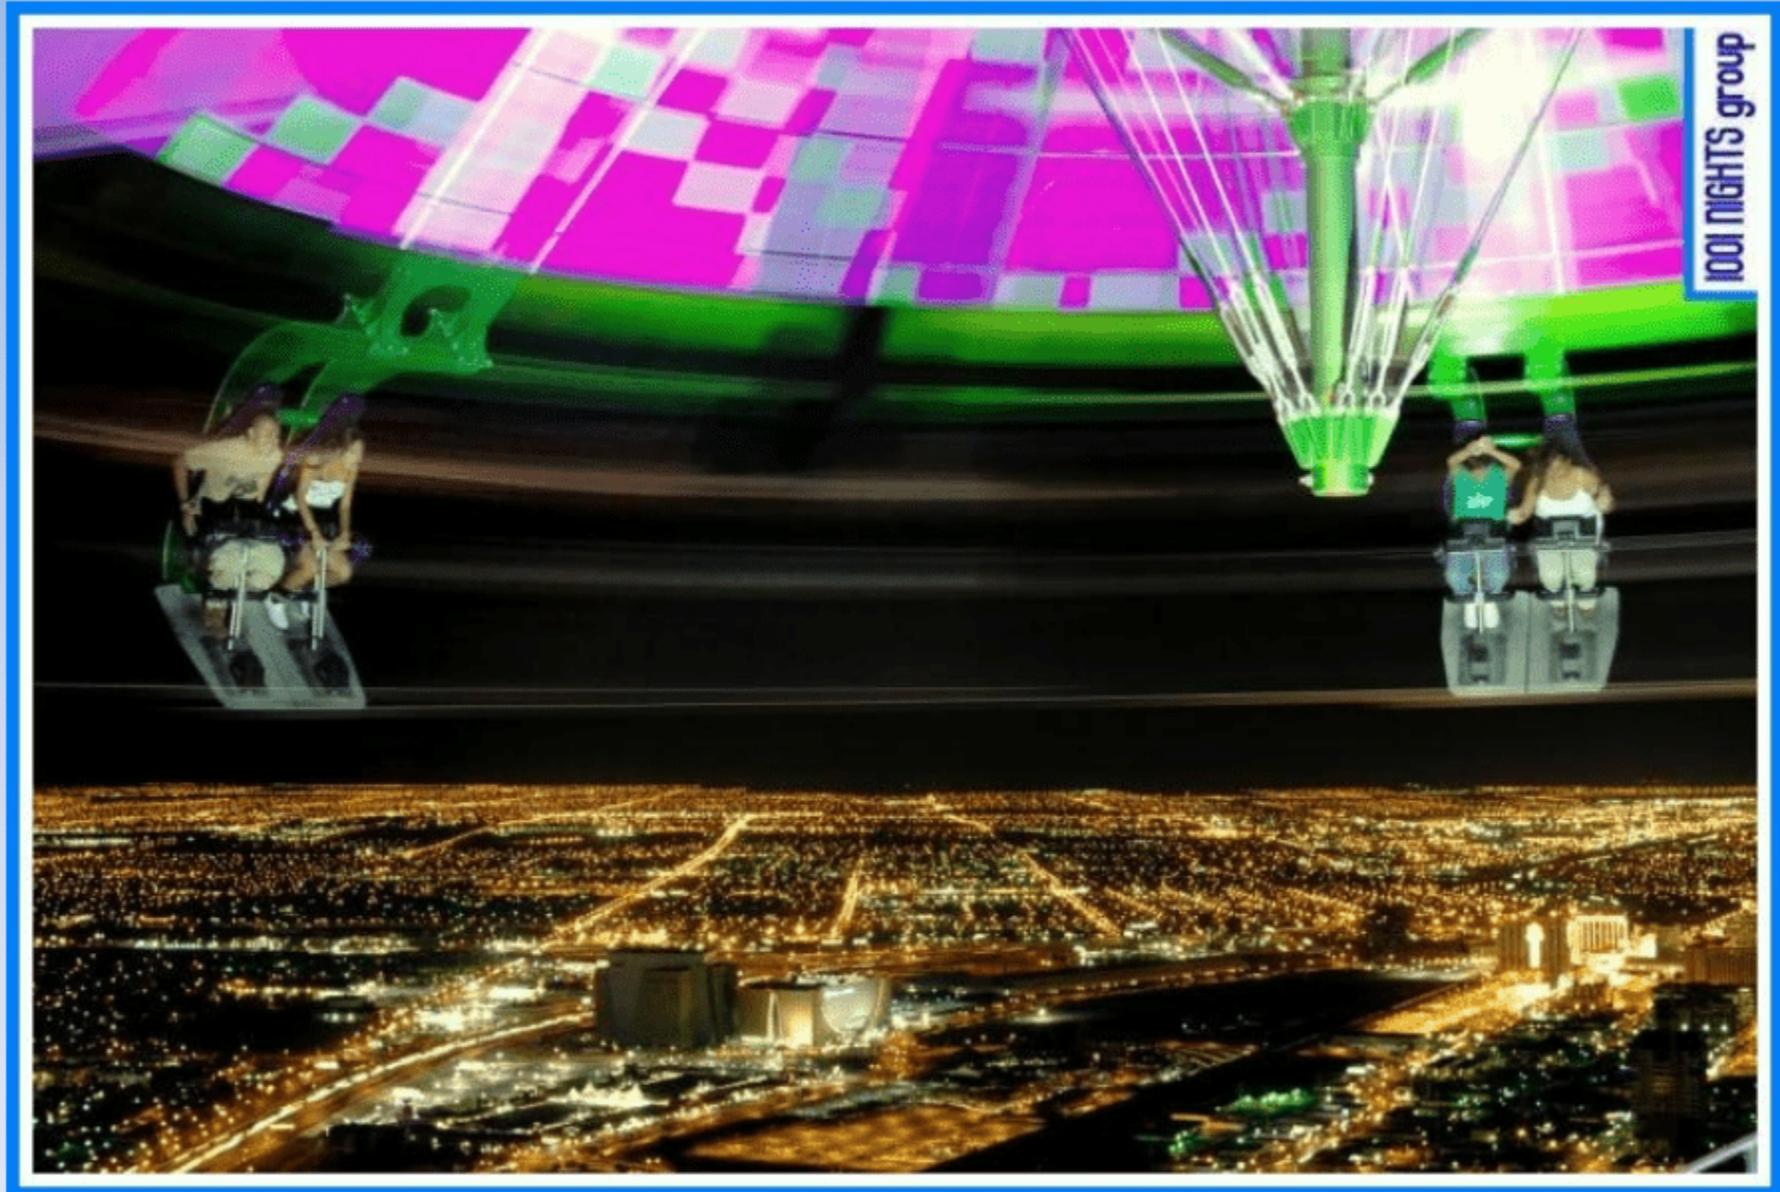

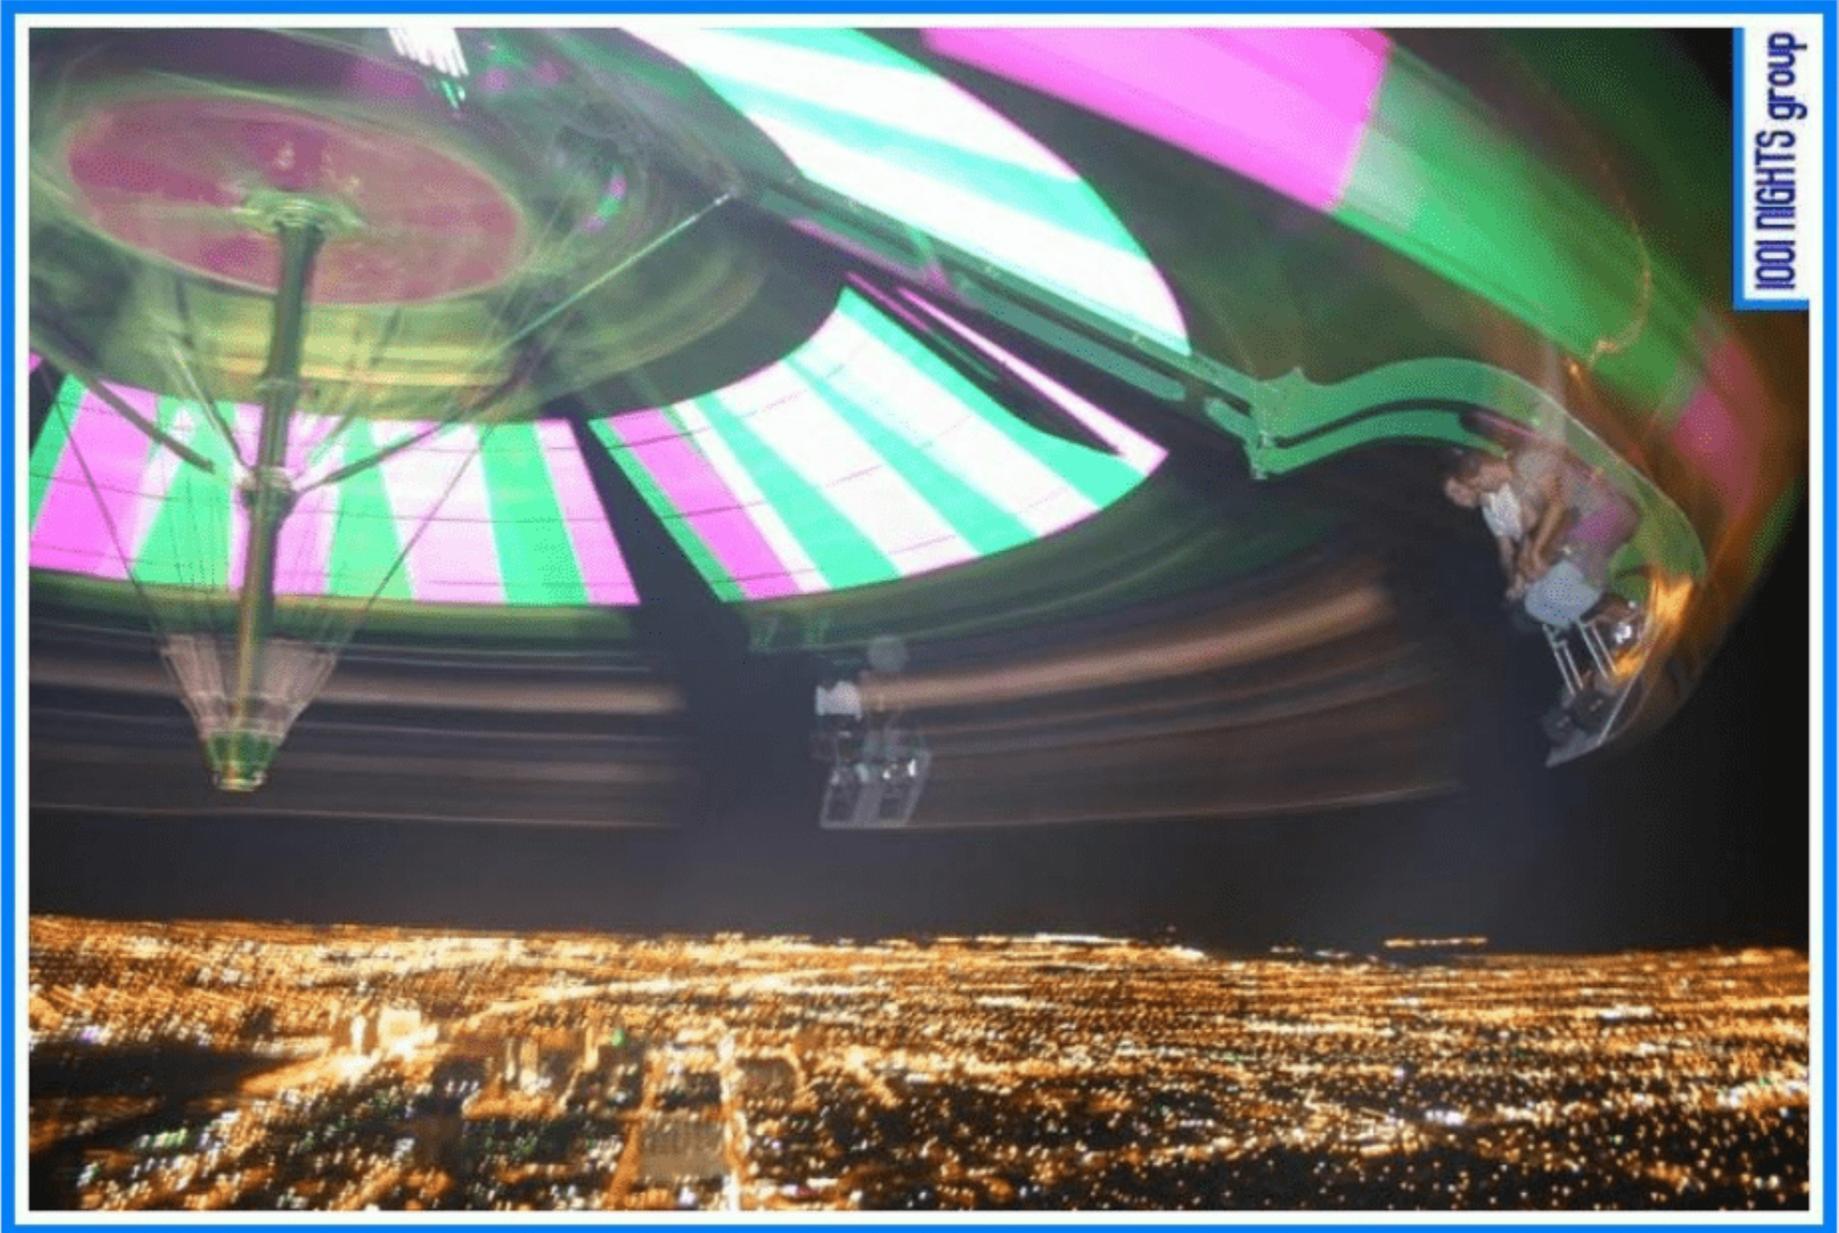

1001 NIGHTS group

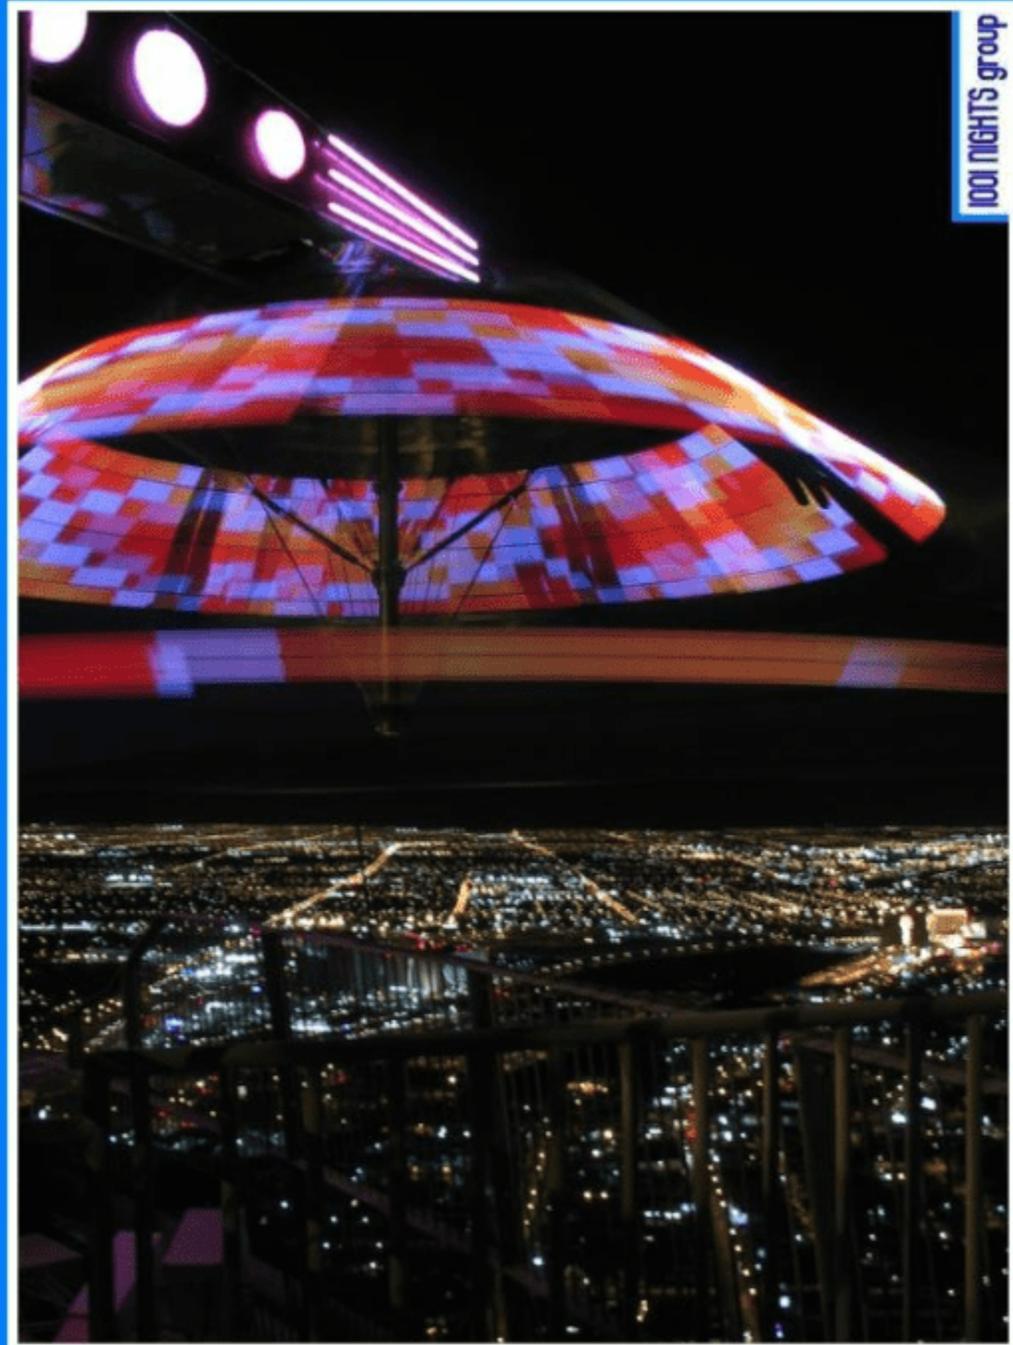

Catch the speed!  
It circles at 40 MPH at a 3G force!!!
