Subject: Welcome to iCloud Mail.

Date: Wed, 04 Sep 2013 14:18:46 +0000

Dear [REDACTED],

Welcome to iCloud Mail. Your new email address is [REDACTED].

With iCloud Mail, new messages are pushed to your iPhone, iPad, and iPod touch, and you're notified when new mail arrives, so you won't miss an important message. And iCloud automatically keeps your inbox and folders up-to-date across your devices and computers.

If you want to use iCloud Mail with other iOS devices or computers, set them up by following these [instructions](#). You can also access your mail on the web at [icloud.com](#).

Sincerely,

Apple

iCloud requires iOS 5 on iPhone 3GS or later, iPod touch (3rd and 4th generation), iPad, or iPad 2; a Mac computer with OS X Lion; or a PC with Windows Vista or Windows 7 (Outlook 2007 or 2010 or an up-to-date browser is required for accessing email, contacts, and calendars). Some features require a Wi-Fi connection. Some features are not available in all countries. Access to some services is limited to 10 devices.
