I really like this Crate and Barrel TV console; it's teak and rattan. (Not sure what size will fit on the wall and if it will mesh well with the RH coffee table)

I also like this RH TV console:

I've put together a Word Doc with photos of everything together to try and get a sense how the TV consoles would look with couch and coffee table.. what do you think?

The Pottery Barn couch comes in 2 sizes.. the larger size is just under 8 ft, so if that will fit can go with that one.
