She also quoted both hand held showers.. the round head and square one. If you like the fixtures, you'll need to choose which handheld you like. Also, are you OK with the 2 way volume valve, which would only allow you to have the overhead shower or the hand held on one at a time? or do you prefer the option to have them both on at the same time, you would just have an extra handle then.

Or if you don't like the handles at all, we can find something different.. like if you prefer to have cross handles, etc..
