Subject: Predictable Function and Occlusion – The IDEA Concept with Heike Kraemer and Sadao Sato

Date: Thu, 22 Jan 2015 20:09:30 +0000

Dear Shuliak,

This continuum is for all dental professionals who wish to upgrade their practice to predictable and long-term-stable comprehensive and interdisciplinary dentistry.

Grow your practice from single tooth dentistry to comprehensive occlusal medicine - Understand when to stay in habitual occlusion and when to use reference position or a defined therapeutic position - Recognize and treat patients with dysfunctional problems - Manage and treat complex cases predictably with long-term stable results.

Heike Kraemer and Prof. Sato will teach you the IDEA concept of Predictable Function and Occlusion which will enable you to confidently plan and treat complex cases.

*"Heike Kraemer and Prof. Sato are the absolute best educators I have ever met. They opened my eyes to an area in dentistry I never knew existed. My ultimate goal is to be the absolute best dentist for my patients. After taking this course I feel that is now possible."
- Jernell Escobar, General Practitioner, Gilroy, CA*
