Dear Shuliak,

Great opportunity: Three Year High-level Orthodontic Program starting in July 2016

This three year Orthodontic Program will teach you in theory and practice the principles and techniques for predictable and long-term stable orthodontic treatment according to the research and concepts of Prof. Sadao Sato.

This program is addressed to all **General Dentists**, who have realized that orthodontics has become a fundamental cornerstone of their restorative treatment in order to achieve good function and to apply minimal invasive treatment.

Also it is addressed to all **Orthodontists**, who are looking for predictable treatment options in regards to alternatives to: orthognathic surgery, premolar extractions, extra-oral forces and treatment for patients with dysfunction.

[For details click here](#)

With the IDEA Orthodontic Program you are entering a dental world which is way ahead of anything else out in the dental field. You will be able to achieve treatment results which cannot be achieved with any traditional orthodontic approach.

This treatment approach will be a complete paradigm shift and will have a huge impact on your dental career. You will become the problem solver way beyond your community.

The Orthodontic mechanics:

All of this is achieved with simple mechanics, rather than a complexity of orthodontic tools or extra-oral forces. Wire bending takes max. 15 minutes. Usually the same wire is used over the entire course of treatment.

The Program schedule:

The modular structure of 3 to 4 day segments allows you to continue your practice and to attend this

program. The tuition is payable in monthly installments. [For details click here](#)

Your Benefit:

These treatment concepts will make your dentistry highly predictable and long-term stable, your dental life will be much easier and fun, and your practice outstanding.

Step out of your comfort zone and discover a new dimension in dentistry!

"I would consider this course to be the best investment I have made in my career. I am proud to expand my dental skills to orthodontics since I have realized that orthodontics became a fundamental cornerstone of my restorative prosthetic practice."

- Cristina Herrera, General Practitioner, Los Gatos, CA
