Thursday sounds good. Anytime should work for me.. I work very close to home and can run over quickly. Just let me know what works for you. I'm working on getting the info for insurance for you.
Also, I forgot to have you look at the area next to my desk that I want to have a quartz composite counter top made for. The material which matches my desk top is Hanstone from Hanwha Surfaces. I've ordered 2 of the white samples so I can get an exact match. Is this a material you can obtain? <http://www.hanwhasurfaces.com/sections/hanstone/index.php>

Hi [REDACTED],
I'm finishing the fabrication and painting by this weekend, I think that the next week I could do the installation. I need to check the dimension of elevator because the counter top is 9' long, I'll be in the city by thursday. please let me know what time I can pass by for your apartment. and please send me the information to prepare the insurances certificate
Best Regards
Fabian

Hi Fabian,
I just got back into town and wanted to touch base and see how my project is going?
Best,
[REDACTED]

Hi [REDACTED]

Yes, I need to take the dimension again, and I go to do a Lacquer sample and take the aluminium grill sample. I'm available this Friday after 5.00pm or Saturday anytime.

Please let me know what time is better for you.

Thank you

Fabian

Hi Fabian,

I would like to go with the aluminum grill and the wooden lacquer counter top option for the radiator cover. (Is there a big difference between the stainless steel and aluminum for the grill? I just want to make sure the aluminum will still be a good quality for this application)

I would also like to go with the option with 4 panels and 4 drawers.

For the desk counter top, I've ordered some samples of caesar stone to see which color will best match my desktop material. I will let you know what I'd like to do there as soon as I get the samples.

In the meantime, I'd like to go ahead with the radiator cover. Do you need to come back and measure again, etc?

Hi [REDACTED]

Attached please find the proposal of the radiator cover and the desk top

Please don't hesitate to call me if you have any questions

Regards

Fabian
