Subject: Water system in the dental room

Date: Tue, 26 Aug 2014 15:47:31 +0000

Hi Anna,

Mr. Epstein asked me to send you this note:

The water system in the dental room should be isolated. Also there is a drain on the kitchen area of the dental office, that will drain toxic material into the sink, so please make sure it does not contaminate the rest of the water system on the island.

Thanks,

Karyna.
