Hey guys,

Can you all keep me informed as to the progress of the office move..what things you'll be moving over, if you're using any of the desks and filing cabinets, what you're leaving behind so I know how to deal with the excess, etc. Are we getting rid of all the obsolete PC computer equipment no one uses.(we should) JE doesn't want any trash, useless things being moved around to the new office space. He wants to shred whatever papers aren't needed rather than just transfer boxes of junk.
