OK, so I am reviewing and I have a couple of questions:

1. I want to confirm that you have already installed a Graff thermostatic trim and rough for your indoor shower
2. Does this hold true for the outdoor shower?
3. In your steam room, you will need a thermostatic trim and rough (unless this is from Graff too), 3 volume controls; 2 for the hand showers and one for the shower head and a shower head

Let me know please so I can adjust accordingly

Hi Akiva,

Thank you very much for your help over the phone. Please see below the pictures of the current shower fixtures configuration as requested.

I hope this helps. We will wait for your advice on the roughs.

Thank you very much!

Karyna

Thank you
Akiva
