Good Morning Rich

As requested

Given there will be little chance that replacement beds will be here by Dec deadline, we will require x 3 plastic bed frames, like what was purchased for the master bedroom from Bloomingdales

Please advise when they can be on site -

Locally we can only get metal frames which we cannot put on the new wooden floors

Karyna we also will need bed skirts for the queen beds, this is something we have not needed before but will need to hide the frames for the temp fix, noting there will be no headboards unless I get direction to by something locally

Any questions or concerns please let me know

Warmest regards
