80 will NOT fit. 78 inches is the biggest we can fit but even that will stick out of the frame.

The frame is actually like a bed spring, there is no opening for mattress to drop in.

Just to be sure, is the length of the inside of the bed frame exactly 77" ?
The mattress that we want to buy is 80" long, could you please confirm that it would not fit?

Karyna,
Sorry. The mattress is actually 77 x 77 and also the frame

77 long and 74 wide or 74 long and 77 wide?
Can you please also give the inside dimensions of the bed frame itself, so that I know what maximum size mattress it can fit?

Thank you.
