No I only did her lab so indeed I can not tell you any more since I did not do a full exam. I would recommend a different medication without side effect profile and a full exam both from internal medicine and gynecology in view of the medication regimen.

Dear Dr. Moskowitz,

Thank you for your email. To clarify and for medicolegal purposes, you are her internist and have examined Ms. Shuliak and are confirming that she is currently in good health with respect to her levels of cholesterol, LFTs, and triglycerides. Please confirm yes.

You will continue to see her in person and monitor her labs monthly with us in collaboration while she is on Claravis 20 mg. Please confirm yes.

Sincerely,

Dr Marmor
