I can try and find the pInto prints when I have a chance, but if you have any free time today could you do a rough size estimate.. doesn't have to be exact for now, but a rough size would be good. trying to sort out what type of material I can print on that size thanks

Hi Sarah the size may be on a alberto pinto blue print . I have measured them before I may have it in a file . it may be easier just to measure them again ! I will measure the canvases in the morning for you. Rich

I'm looking into options of printing a photo to cover them and I need to know the size so I know what sort of material I can work with for printing. are the sizes on the blue prints or anywhere that you know of?
