Hey [REDACTED],

The vanity quote is attached, and as I mentioned, this would take 10-12 wks, so the sooner the better to order. The width on this is 25 5/8" wide. What type of faucet will you be using? This countertop comes with a single hole, let me know so I can either sell you one of our faucets or make sure to provide you with the correct drain you need.

As far as the floor tile, the thickness is 3/8".

Any other questions, let me know!

Marisa

Hi Marisa,

Can you tell me what the thickness of the Avenue tile is? I'm going to use it for my kitchen flooring and I'm trying to make the kitchen floor level with the outside wood floor and I need to know the thickness in order to figure that all out. thanks!
