Hey miss bella..

Would you be able to set up an appointment with Time Warner for them to come sort out the cable and internet in apt 8A? When they did the floors and painting in there, it messed everything up. There is currently a huge pile of cable wire all wrapped up sitting in the hallway which needs to be brought around to the living room and hooked up to the TV. this will require them to have to attach the wire up and over the closet and a few doorways, around to the living room to reach the TV..

Also, do you remember the outcome with 11P internet? I know they had to return to fix it before.. do we need Scott to go in to set up the wireless? I don't remember what happened in the end
