**Importance:** Normal

---

I think its only 3" not sure. Then we can put a 3/4" thick x 5"-6" stone shelves on both shelves n it will come out of the wall by 2"-3". I will be at 66st at 8:30 till 9:30 n be back in the afternoon. If you are in the bldg. Let me know. You can see also the bedroom painted with primer ready for venetian plaster next week. We need this week to spray paint your closet before vnetian plaster. The bathroom also is done with the grout.

Sorry, I don't quite understand what you mean. What's the current depth of the shelves in 11J?

> Hi [REDACTED], as I mentioned before that the depth of the shelf is as is at the jobsite because there is a pipe behind it. My suggestion is to make the shelf wider like what you have 5" or more. It will be coming out like 2". We will make it a solid sile stone 3/4" thick. White or beige or if you cold pick the stone sample and we will get it for you. Penn
