These are animal skins. I don't know if they would work or if it is nice to have them near the pool, but in terms of being soft, they definitely are.

They are not pure white, they have variations in the color obviously. Little areas that are slightly yellowy/greyish.

The largest sheepskin they have in stock at the moment is 12 x 18, which they could cut to make a 12' x 17'

The alpaca is 11' x 16'
