Good evening [REDACTED]

Thank you very much for putting this all together. May I give you a call tomorrow to discuss a couple of things?

Thank you,

Karyna

Good Evening

As requested attached a brief breakdown with photos of items to be reviewed. I reached out to the 71st team for any updates on progress, as of date & time I have not received a response, hence some items may have been completed

As already mentioned the areas which require the most work are the Mech Storage Bays, noting there has been a great deal of progress in the Sub Cellar over the last few weeks

Carlos & Arline have a good understanding of what needs to be completed & have a great work ethic, so hopefully things can start moving along.

Merwin did get a contractor in for the leak in the Cellar Kitchen last Thursday, he was suppose to complete the fix on Friday

Merwin also got a contractor in for the Sub Cellar Chiller, which was making the noise & from all accounts that is running correctly

As Karyna knows, some changes have been made to how the intercom for the front door is received, although we both agree this does help in some areas, it does not solve the main issue of not having to have someone close to the front door. Will investigate and see what we can come up with.

If you have any question or concerns please let me know

Warmest regards
