Hi Ana,

Here are the answers to your questions:

1. The floor should be epoxy or linoleum. It needs to be grayish color, that looks similar to the picture below. Please send me pictures of some samples and I will choose one. The color from Benjamin moore palette that you can use as a reference is Sea Haze 2137-50
2. The plastic shelves are ok if you already bought them.
3. For the final paint please use Benjamin moore Super White OC-152 paint in a flat, matt or eggshell finish (so that it is not shiny).

The overall look should resemble this picture:

Ok.

TJ is painting GSJ storage at the moment with top coat and then he will do a final paint of your choice.

-What would you like us to do about GSJ storage floor?

-Are the plastic shelving ok to use?

-Would you like GSJ storage room to be painted the same color as housekeeping on LSJ?

no, I haven't heard anything from Bossman as yet.

Hi Ana,

I need you to communicate with me each step that is being done with the GSJ storage please and send me pictures. What are the guys working on right now? Did Mr. Epstein advice on where to install the staff bathroom? All the purchased for that storage should be reviewed with me before you buy them.

Regarding the LSJ housekeeping renovation, I also need to see pictures please. What is being done there at the moment?

Thank you,
Karyna.
