Hi Scott..

I need to buy a 27" iMac for JE for his new pool cabana on the island. When I tried to ask him if he wants it pimped out more than the basic model, he said to ask you. So.. I'm not sure if I should do any of the additional features you can add on upon checkout. I'd like to order it online and just have it shipped straight to the island. What do you think I should get extra? muchos gracias.
