I am still in Miami but I am leaving for NY on Monday, then continuing for Paris etc. I'll be back on the 22nd of March. When ever you're ready we'll talk about the Magnum 80. I assume you have seen the CD of the 80' ? Although this first 80 was equipped only with 2 X 1800 HP, it was still pretty impressive, as you remember. It would be fun to build a gas turbine Magnum 80 with Ralph Lauren. Would certainly be very cool! I know the King of Spain was really excited about the idea, too..
