<html>

<blockquote type=cite class=cite cite>Students at a Med School were receiving their first anatomy class with a
real dead human body. They are all gathered around the surgery table
with the body covered with a white sheet. Then the professor started the
class by telling them:

"In medicine, it is necessary to have 2 important qualities as a doctor:
The first is that it is necessary that you don't get disgusted."

The Professor uncovered the sheet, sunk his finger in the butt of the
dead body, withdrew it, and then stuck his finger in his mouth and
sucked it.

"Go ahead and do the same thing" he told his students. The students
freaked-out, hesitated and in-turn, sunk their fingers into the butt of
the dead body and sucked them after withdrawing them. When everyone
finished, the Professor looked at them and told them:

"The second important quality is observation. I inserted the middle
finger and sucked the index. Pay attention people!"</blockquote></html>
