

Subject- Rentricity NSF\_Certified [Technology](#) Ready for In-Pipe Hydro Clean Energy Market

Dear {!Contact.FirstName},

Rentricity, Inc. is proud to announce the successful NSF-61 certification of a line of pumps that can recover energy in various water operator pipelines  
Insert Link to press release

Rentricity's exclusive agreement with the Cornell Pump Company provides NSF-61 certified turbines keeping your water safe for consumption and use by food services industries. This exclusive deal positions Rentricity as the primary provider of NSF-61 certified in-pipe turbine equipment in the United States.

Rentricity generates renewable energy from your water operations – helping to **power your facilities, improve your energy independence and earn community recognition for advancement of your sustainability goals**. Rentricity takes advantage of the untapped energy potential in water pipeline hydraulics to generate clean, renewable electricity. Rentricity can review your water network on a system wide basis, identifying the most addressable sites with the best economic paybacks, typically in the three to eight year timeframe.

Rentricity has the most in-conduit hydro experience, having reliably executed energy recovery projects for water operators since 2003, and establishing itself as the leading supplier of safe, dependable and economical in-pipe energy recovery systems. Also note that Rentricity expects to bring three additional projects online ranging in sizes from 10 to 325 kW in California, Pennsylvania, and Halifax, Nova Scotia in 2014. Rentricity also recently completed a 12kW In-Pipe Hydro Recovery System for the city of Barre, VT.

Don't have the discretionary capital budget? No problem. Please ask us about our **third party financing options** to provide funding solutions similar to those used to finance solar PV projects.

Interested in learning more about harnessing the available hydraulics in your water network to produce renewable energy? Rentricity can answer your questions and discuss [our complimentary assessment program to determine the energy recovery opportunity in your system.](#)

Please contact us via phone or email (below)!

Thank you for your consideration.

Best Regards,

Frank
