**To: LSJ-LLC**  
**Attention: Danny Vicars**

**RE: Duplex water softener**

Poly Caribe is pleased to provide this quotation for a twin alternating softener suitable for commercial applications ranging up to 210,000 grains of hardness removal capacity, at flow rate up to 40 gallons per minute. This is a ideal softener when soft water is required 24/7, without interruption.

Specifications for this unit are model PC/M2228SE, LCTA-150 with Fleck 1.5" 9500 control valve. Pipe size is 1-1/2", valve body is brass, the control valve is metered, the mineral tanks are fiberglass reinforced plastic NSF approved, the brine tank is polyethylene, the media is Cation resin; high capacity. The Mineral tanks are 21"x62" and hold 7 cubic feet of resin and 100 lbs. of #20 filter media, the brine tank is 24"X 50" and holds 800 lbs. salt to fill. The shipping weight for this system is 1,400 Lbs.

**Price for the above described duplex water softener. \$10,449.00**

Shipping and clearance charges for the above described equipment. **\$1,500.00**

**TOTAL OF ABOVE: \$11,949.00**

All of the above equipment is available for immediate shipment and would arrive in approximately seven business days upon your request to order.

Upon your request to order we will require a 50% (\$5,974.50) deposit to place this order. The balance due would be required upon delivery to St Thomas VI.

We accept the above described equipment and terms. By \_\_\_\_\_,  
of LSJ-LLC. Date \_\_\_\_\_.

Best Regards, Don Goetz
