

OnPointSM

GE's business jet maintenance solution for CFM56 & CF34 engines

For nearly 10 years, GE's business and general aviation customers have enjoyed the peace of mind and simplicity of managing engine service with OnPoint. This flight hour program provides predictable maintenance costs and access to GE's world class service network.

The aviation industry has recognized the enhanced asset value protection that OnPoint's comprehensive service provides, worth as much as \$2 million according to *Aircraft Bluebook*. Aircraft buyers and sellers appreciate that the program is transferable at no cost.

As the #1 rated* turbine engine product support provider, our goal is to earn confidence from our customers with every encounter.
