

Here are the prices for cushioned coatings for the tennis court

Tournament Series

- 1 coat of acrylic resurfacer
- 2 coats base cushion .1-.3mm rubber
- 3 coats Plexicushion using .05-.1mm rubber
- 2 coats fortified plexipave color stripe

Step method

This is similar to the next option called the Prestige system. The Difference is that the material is "feathered out" from the playing surface to the out of bounds area. Basically it is the same as the Prestige but less material is used on the out of bounds areas but not the palying areas

Prestige

- 1 coat acrylic resurfacer
- 4 coats of base cushion rubber .1-.3mm
- 2 coats of plexicushion .05-.1mm rubber
- 2 coats of fortified plexipave color stripe

There is a website that has more information on these applications at [REDACTED], call me if you have any questions at 505-450-3654

Thank you,

JJ Blea
