**NEW TRADE IDEA: Implications of Cheap Natural Gas**

We believe cheap natural gas in the US is creating attractive longer-term investment opportunities, particularly around the liquid natural gas (LNG) supply chain as the commodity continues to globalize. Demand for natural gas is steadily increasing across the world due to rising energy needs, the search for cleaner energy alternatives, coal plant retirements, and nuclear power concerns. However, natural gas supply remains concentrated (40% comes from Russia and the US) and due to the difficulties in transporting the commodity, natural gas pricing can vary significantly across different geographies. With North American natural gas trading at 70-80% discounts to Japanese and UK markets, we believe efforts to close this gap will drive continued growth in the LNG industry.

We encourage investors to build exposure across the LNG supply chain for the long term: E&Ps, pipelines, liquefaction sites, and shippers. JPMorgan research estimates that the number of countries with LNG import capabilities will rise from 25 at the end of 2011 to 48 by the end of 2015 creating as much as \$1 trillion in CAPEX spending for the Equipment & Services industry through 2018. The North American market alone has 7 LNG export projects in the approval process and is expected to come online in 2015-2016. As these LNG sites are built, [redacted] and pipeline companies should benefit (from higher natural gas prices and increased volumes) as well as shippers and ship builders from the need to transport the LNG to markets with limited domestic access.

Additionally, there is a near term opportunity in US-based chemical and fertilizer companies which use natural gas and its derivatives as major inputs. These companies are experiencing a competitive advantage over their non-US counterparts and are able to manage their margins better.

**Location, schedule and scale of new liquefaction capacity**

Source: JPMorgan

Short Term	End Users	Fertilizer and Chemical Companies
	Liquefaction	E&C firms focused on global energy projects
Longer Term	Pipelines	MLPs
	Exploration & Production	Shale investments near LNG sites/investments

**CLOSING TRADE IDEA: LONG INDONESIAN RUPIAH**

We are closing our long Indonesia Rupiah trade as we see limited upside in the currency outside of carry as we are now within 1% of JPMS LLC's forecast of 9,000 by mid-year 2012. Over the two years since we recommended the Rupiah, investors have benefited from 5-6% of carry annually plus 3% currency appreciation.

**CLOSING TRADE IDEA: LONG AIRLINE STOCKS**

We are closing our long airline stocks trade. Since we initiated the trade, airline stocks have declined 14% driven first by a 40% rise in oil prices and then as oil retreated, concerns of a slowing economy. Bookings in the space remain strong and the consolidating industry continues to support improved pricing power. However, with two of the risks we highlighted having played out, a labor-negotiation driven bankruptcy filing, and Europe driven slowdown concerns, we believe it is time to throw in the towel and close this trade out.

## CLOSED TRADE IDEAS

Trade	Rationale	Risks	Levels	Rationale for Closing
Short Agency Mortgages	<ul style="list-style-type: none"> <li>Mortgage rates are trading at historically tight levels to US Treasuries.</li> <li>Fed poised to end agency MBS purchases at the end of March.</li> </ul>	<ul style="list-style-type: none"> <li>Fed continues to buy MBS but ends purchases of Treasuries</li> </ul>	6% Fannie Mae 30Y Mortgage Spread <ul style="list-style-type: none"> <li>Jan-5-2010: -2 bp</li> <li>Fed-25-2010: 16 bp</li> </ul>	Given the move in spreads we are closing this trade as further upside is likely to be limited and accompanied by further government intervention.
2-10 Yield Curve Flattener	<ul style="list-style-type: none"> <li>Spread between 2Y and 10Y swaps are near historic highs</li> <li>Expectations for Fed tightening should drive sell off in 2Y bonds causing spread compression</li> </ul>	<ul style="list-style-type: none"> <li>Fed remains low for much longer than expected</li> <li>Fed ends purchases of US Treasuries or purchases do not offset issuance</li> </ul>	Spread between 2Y and 10Y swaps: <ul style="list-style-type: none"> <li>Jan-5-2010: 256 bps</li> <li>May-7-2010: 238 bps</li> </ul>	Profitability levels reached as pullback in risk drove a rally in long term rates. Fed is expected to maintain its "low for long" language but looking to re-enter the trade when posturing changes.
Long Palladium	<ul style="list-style-type: none"> <li>Strong demand and leverage to recovery in the global consumer.</li> <li>Supply challenges due to frequent production disruptions in Russia.</li> </ul>	<ul style="list-style-type: none"> <li>Double dip recession.</li> <li>Discovery of additional supply outside of Russia.</li> </ul>	Palladium: <ul style="list-style-type: none"> <li>Jan-5-2010: 420</li> <li>Mar-4-2010: 456</li> </ul>	Reached JPMS LLC target of \$450/oz.
Long Turkish Equities	<ul style="list-style-type: none"> <li>Favorable valuation versus Emerging Market equities.</li> <li>Valuation re-rating from structurally lower inflation and interest rates.</li> <li>Signing of IMF stand-by agreement could be a catalyst.</li> <li>Upgraded to BB in February.</li> </ul>	<ul style="list-style-type: none"> <li>Higher than expected increases in inflation or interest rates.</li> <li>Failure to sign IMF stand by agreement.</li> </ul>	MSCI Turkey (Local): <ul style="list-style-type: none"> <li>Jan-5-2010: 794,548</li> <li>Jun-9-2010: 778,537</li> </ul> MSCI Turkey (USD): <ul style="list-style-type: none"> <li>Jan-5-2010: 549</li> <li>Jun-9-2010: 493</li> </ul>	Increasing uncertainty on political front and market fundamentals. Likely to trade in line with the region.
Long Temporary Unemployment	<ul style="list-style-type: none"> <li>Temporary hiring has rebounded strongly and set to turn positive.</li> <li>Temp hiring recovery typically leads overall employment.</li> <li>Attractive valuation vs. prior expansions.</li> </ul>	<ul style="list-style-type: none"> <li>Temp hiring deteriorates.</li> <li>Double-dip recession.</li> <li>Increase in hiring costs due to political / regulatory changes.</li> </ul>	1500 HR & Employment Services Index: <ul style="list-style-type: none"> <li>Feb-26-2010: 59.55</li> <li>Mar-23-2010: 67.04</li> </ul>	Profitability levels reached as temporary employment turned positive on year over year basis and recommended closing positions due to lack of near term catalysts and valuations that were already pricing in improving temporary employment picture.
Long Chilean Rates	<ul style="list-style-type: none"> <li>Chilean interest rates are expected to rise due to higher inflation (strong copper prices).</li> <li>1Y swaps increase expected over the next year is 2x expected policy rate increase.</li> <li>Tightening by China could reduce need to raise rates in Chile.</li> </ul>	<ul style="list-style-type: none"> <li>Strong copper prices supported by China or solid global recovery.</li> <li>Strong local growth driving higher inflation."</li> </ul>	Receive fixed 1Y CLP rates 1Y forward <ul style="list-style-type: none"> <li>Feb-26-2010: 4.34%</li> <li>Jun-9-2010: 4.09%</li> </ul>	Rates have declined about 30 basis points and further decline is limited given consensus policy rate expectations.
Short Chinese Rates	<ul style="list-style-type: none"> <li>Inflation / overheating concerns driving policy tightening.</li> <li>Tightening came earlier than investment community expected.</li> <li>Strong growth should also lead to higher rates.</li> </ul>	<ul style="list-style-type: none"> <li>Benign inflation in China.</li> <li>Slow down in growth or double dip recession driving further stimulative government actions.</li> </ul>	1Y CNY Swaps Rates: <ul style="list-style-type: none"> <li>Feb-26-2010: 2.27%</li> <li>Aug-2-2010: 2.10%</li> </ul> 5Y CNY Swaps Rates: <ul style="list-style-type: none"> <li>Feb-26-2010: 3.74%</li> <li>Aug-2-2010: 2.91%</li> </ul>	Rates likely to remain low for the near term given slowdown in economic data, accommodative government, and policy measures addressing pockets of inflation in certain industries.
