General System Description

Proposal 47425.0 Security Console Revision and Camera Upgrade

Project Objectives:

A. Console -

Consolidate the footprint and modernize the technology at the security console.

Security 101 will re-purpose the components of the existing console where possible, eliminating the return portion and retain the area and plane that abuts the wall.

1. The upper Four monitors will be removed from the rack space and replaced with Four, 19" LCD Monitors
2. The lower four monitor bays will be dedicated to a Security Workstation, The Existing Printer, The Building Control Workstation. An additional 19" LCD monitor in the lower fourth bay will be provided to be purposed at the owners discretion.
3. A 49" High Definition LCD Monitor will be wall mounted above the Console to be purposed either to view a full matrix of the cameras or any portion thereof, down to a single camera.

B. Camera Replacement -

At the following locations, the existing analog cameras will be replaced with High Technology IP / Megapixel Cameras as deemed appropriate for each location based upon lighting, resolution requirements and environment.

Each will produce High Definition images for both live view and archiving through the existing ExacqVision NVR and the American Dynamics Matrix System.

Converters are provided as required to enable the re-utilization of the existing coaxial cable infrastructure and to allow the signals from the new cameras to be passed through the matrix and on to the local and remote monitoring locations at the Front Door and the Safe Room.

Replacement Camera Locations:

1. 6th Floor Balcony
2. Cellar Court Yard
3. Court Yard
4. Front Door Intercom
5. Front Lobby / Entry
6. Roof Top Fixed Camera
7. Service Door Intercom
8. Side Entry

C. Maintenance -

As part of the system revitalization, all remaining analog cameras will be cleaned, focused, tested, programmed and adjusted to insure the system is delivering at peak performance levels.

D. Future Consideration -

At both Remote Monitoring locations, the Front Door and the Safe Room, The existing monitors (eight in total) may be replaced with 6.4" LCD Monitors, utilizing the existing cabinetry. This will be covered under a separate quote, if required, once the system is complete, tested and all system maintenance has been completed.
