Design. Apple TV, streamlined.

Our most entertaining design yet.

The sleek new Apple TV has been completely retuned for your entertainment. It's 80 percent smaller than the previous generation — even with a built-in power supply. Which makes it perfect for sitting neatly on a widescreen TV stand or squeezing into a crowded media cabinet. Not only does the new Apple TV have an amazingly small footprint, it's also incredibly energy efficient. It stays cool without a fan, so it's never noisy. And when it's not filling your living room with drama, romance, and comedy, it uses less power than a night-light.
