Project Number 78

Project Name Upgrade Processor/ Power Conditioner

Purpose / Description:

Upgrading Rane Processor and Power Conditioner. Stripping the program from current setup, so as to duplicate & improve the settings on new equipment.
Solving the issues of sound distortion & unreliable audio quality
Panomax is to replace the existing Furman, all existing equipment is original
Note: Rane Processor needs to be ordered, approx 7 - 10 business days to receive product

Manufacturer / Vendor: Constellation Home Electronics

Note: All estimates must be submitted with this form.

Constellation Home Electronics

Great Room

1 **Furman Sound ADP-1520B** \$29.95
This adapter cord allows you to use your 20 amp products in 15 amp applications. Approximately 12" long, 20 amp socket to 15 amp plug.

1 **PANAMAX M4320-PRO** \$1,049.90 *
8 Fully Controllable/programmable Outlets Via Rs-232c W/ 2 X Front Panel Programmable Reboot Buttons. 20a

1 **PANAMAX BLUEBOLT-CV1**
Bluebolt Secure Hosted IP System Control And Monitoring Card - Fits M4315-pro And M4320-pro

1 **PANAMAX M5300-PM** \$509.90 *
Home Theater Power Management

1 **PANAMAX GRM2204**
Rackmount Kit / Double High

1 **Rane HAL3** (7-10 business days to receive product) \$1,623.75 *
The HAL3 furthers this trend with Ranes Line-Plus inputs for an impressive 4/6 inputs by 8 outputs at a price point that fits the budget, but still allows open-architecture processing. Couple this with one of Ranes growing army of RADs (Remote Audio Devices) to get a set of analog inputs and/or outputs up to 150 meters (500 feet) away.

Great Room Total: \$3,213.50

* Price Includes Accessories

Scope of Work

In the Theater we will be upgrading the control system with a new Crestron processor. This will be controllable through an app for the iPad or the iPhone. The app is purchased in the app store for \$99.00 a piece. The app will be an easy to use version of the Sony app with the ability to control all equipment.

In the Great Room we will be upgrading the outdated existing Rane audio processor with a newer higher quality Rane processor. The power conditioner will also be upgraded to a more reliable current model. We will use a dedicated 20 amp conditioner for the 3 Crown amplifiers and will use a 15 amp conditioner for the rest of the AV gear. This is highly recommended since the Crown amps will draw so much power. We will also be stripping the program from the current setup, so we can duplicate and improve the settings on the new gear. This will fix all issues with sound distortion and unreliable audio quality.

This is the best option for your system. There are other systems available that are less expensive alternatives but we feel that this one will meet your needs the best. If this is not the way you want to go, we can easily come up with a less expensive option. This option however will not be as good as the current bid. We also know that you did not like the Crestron system that you had before, but we are very confident that we will be able to make this system work in a easy to operate intuitive manner.
