DISCLAIMER: Forex trading involves substantial risk of loss and is not suitable for all investors. The high degree of leverage that is often obtainable in Forex can work against you as well as for you. Increasing leverage increases risk. In any market where a potential for profit exists, there exists also a risk of loss. Past performance is not necessarily indicative of future results. This is not a solicitation to invest and you should carefully consider your financial situation as to the suitability to your situation prior to making any investment or entering into any transaction. No representation is being made that any account will or is likely to achieve profits or losses similar to these being shown.

\*Client account leverages have been modified at the client's discretion from time to time. 10:1 returns are taken directly from accounts traded live at 10:1 leverage from 01/2011 – 12/2011, adjusted down from accounts trading live at 20:1 leverage from 01/2012 – 05/15/2012 and then directly from accounts traded live at 10:1 leverage from 05/16/2012 – current. 3:1 returns are adjusted down from the 10:1 returns.
