DATA UTILIZATION

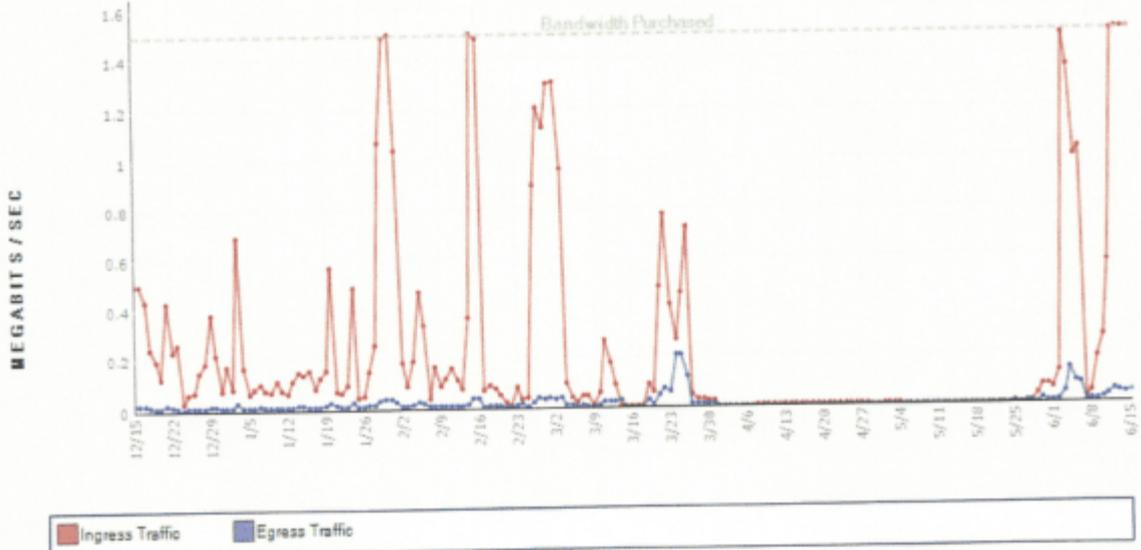

Chart Information

Metrics are collected every 5 minutes and converted in to BPS (Bits Per Second) values.
Traffic - This metric displays the BPS average of the 5 minute periods within the selected duration.
Max Traffic - Max Ingress/Egress is available on the charts greater than 1 day and less than 6 months. This metric represents the highest BPS value of the 5 minute periods within the selected duration.
Egress - Traffic originated by the customer and received by the tw telecom edge/access device.
Ingress - Traffic transmitted by the tw telecom edge/access device destined to the customer.

Disclaimer Information
