Attachments: G5505173_DECOMPRESSION_PORT.docx; ATT00001.htm

Attached is the prelim dwg. - For ref only. Need to change length dimension. Anticipate 2" vertical lip. Yes we can add belts / straps.

I just got to Aruba with family- back in office on Thursday.

I will have eileen or jay get you dimensions to see what feels aesthetically correct for both length (space between #2 seats and new arm rests). When eileen and i looked at this yesterday, we thought the "footprint" should be about 21.75" inboard / outboard. Using .50" composite wrapped in leather, leaving room for a 20" wide chest (the same width inbd / outbd as the width between the arm rests of the seats).
