F1000 Research

Sign up for regular alerts of the latest *F1000Research* articles

Sign up to receive the *F1000Research* table of contents alert and get weekly or monthly emails with new articles from the journal.

Special features of our alerts

F1000Research is an original Open Science journal for life scientists, offering immediate publication, transparent invited peer review (post-publication) and full data deposition and sharing. Because of our innovative publishing model, our table of contents alerts offer many beneficial features that differ from those offered by more traditional journals:

-  • **View articles just days after submission:** all articles, including research findings, analyses of scientific developments, opinions, and new datasets are published immediately, following a quick internal check for obvious inappropriateness.
-  • **Open refereeing:** all referee reports generated by the full and thorough peer review process are immediately viewable on both the HTML and in the PDF, together with the names and affiliations of the referees, so you can see who said what. Articles that pass peer review will be indexed in PubMed.
-  • **Author and community discussion:** all responses from the authors to referee comments, as well as feedback on articles from the wider research community are published so you can see what others think of the research and of the referee comments.
-  • **View updates to articles:** many authors choose to revise their articles based on the feedback they receive and each article version can be separately viewed and cited. The CrossMark logo placed on all article PDFs means that you can instantly check for article updates even after you download a PDF to store elsewhere.
-  • **View, download and cite the data behind every article:** reports of findings of new research are always accompanied by the complete dataset on which they are based, provided in a form enabling confirmation or reuse of the data by other researchers.

How to sign up

To sign up for the *F1000Research* table of contents alerts, you will first need to [register for a free MyF1000 account](#) (if you haven't already done so), and check the box to receive "*F1000Research* table of contents alerts". If you already have a MyF1000 account, simply visit [REDACTED] to sign up.

Your free account will also enable you to:

-  • Submit articles to *F1000Research* and post comments on published articles.

- Deposit conference posters and slides in F1000Posters, our open access repository.

- Access the article recommendations from the F1000 Faculty on F1000Prime with a one-week free trial.

If you would like to submit an article to *F1000Research*, our [author guidelines](#) will provide you with more information on the editorial process. Once you are ready to submit, simply fill in the [submission form](#). If you have any questions, please contact us at [REDACTED].

With kind regards,
Rebecca
