Jeffrey,

I've been studying the specs on the BBJ,

With 9 aux tanks installed on this BBJ, I figure the range of 13.5 hours of hang time. 14.2 hours of fuel.

Holds 71,000 lbs of fuel, (10,597 gallons) and burns 5200 lbs per hour (775 gallons per hour) Mach .78 440kts average, or 5000lbs per hour long range cruise. Mach .74 or 420kts.,

Mach .80 is 460kts and burn of 5500lbs per hour.,

Nice range
