Hi Carlos

Good speaking to you this afternoon.

From our discussions it sounds like a 10.0 or 11.3 meter Naiad would work extremely well for your employer's needs. I've attached a couple general arrangements of some law enforcement boats that may work very well for him. Please note that we can do a custom cabin very easily and these are only a small sampling of our design inventory. The law enforcement style cabin allows for full walk-around at one level.

All the boats are available with either full-circle inflatable tubes or D-shaped tubes in either inflatables or foam core. Our foam core is soft and externally looks just like a RHIB. It is not hard and unforgiving like a SafeBoat collar.

I've sent some photos of several other vessels for you to look at as well.

Once we narrow down a size and basic layout, we'll create a new GA specifically for your employer's project.

Thanks

Steve

Steve,

I just spoke with Carlos. I believe they called last year about a custom yacht tender for their private island, Little Saint James.

They are looking for a tender that is similar to their current tender (see attached photos). Sounds like they have their eye on the Oracle 10 meter but with a slightly different layout.

I told Carlos you would get back to him to discuss options and pricing. His number is 340-513-4309

Jen
