 Laterality in Health and Disease

## Dear Dr. Jeffrey Epstein,

The Luria Neuroscience Institute invites you to attend two **lecture series** that cover a wide range of topics on the relationship between the brain and the mind in health and disease. The programs are intended primarily for professionals concerned with **mental health and with brain and brain disorders**.

7 Continuing Education Credits for each day will be awarded .

The fee is \$495 per day. A separate CE credits processing fee charged by CE credit sponsor applies.

**Location:** Luria Neuroscience Institute, 315 West 57th Street, Ste 401, New York, NY 10019.

### 1. Brain and Cognition: A Cognitive Neuroscience Lecture Series

**Date:** May 20, June 17, 2017 (all Saturdays).

**Time:** 9am - 6pm (with a lunch break and two short breaks).

#### Topics to be covered:

- May 20
  - Intelligence.
  - The creative brain.
  - The emotional brain.
- June 17
  - Neural mechanisms of arousal and attention, and attentional disorders.
  - Neural mechanisms of memory and amnesias.
  - Brain development, brain aging, and current concepts of neuroplasticity.

### 2. Neurocognitive Disorders: A Clinical Neuropsychology Lecture Series

**Date:** May 21, June 18, 2017 (all Sundays).

**Time:** 9am - 6pm (with a lunch break and two short breaks).

#### Topics to be covered:

- May 21
  - Seizures and their effect on cognition. Their classification, neurobiology, and cognitive profiles. Diagnostic and differential diagnosis issues. Temporal lobe seizures.
  - Neoplasms and their effects on cognition. Types of brain tumors: malignant vs. "benign." Their classification and effects on cognition.
  - Movement disorders and their cognitive component: Parkinson's disease, Huntington's disease, ALS. Their neurobiology, natural history, and cognitive profiles. Diagnostic and differential diagnosis issues.
- June 18
  - Addictions and substance abuse. The effects of various illicit substances on the brain. Alcohol abuse and Korsakoff syndrome.
  - Forensic aspects of clinical neuroscience. Review of typical issues where clinical neuroscience and law intersect.
  - Forensic aspects of clinical neuroscience. Review of typical issues where clinical neuroscience and law intersect.
