Here's what I need help with ... Wednesday and THANK YOU

Bgc3

I've been asked to help provide recommendations on bg next steps for ALZHEIMER dementia within the next 3 months. He doesn't want to create a new institution. He's going to invest in an existing fund that is a joint project across a lot of pharma companies. He's interested in (a) biomarkers (b) clinical trial registries. Need a good strategy other than just researching scientists and doing homework for Larry.

6 months ends October 25. Would like to have something great to show for the time.

Plants

I need an angle to pursue that involves clinical side / humans

Next steps

I've got another few months w bgc3 and will try to complete endovascular cases over the coming month/year but really want a better "path" - could be vascular/plants but could be elsewhere. Trying to focus and use time well. Biotech? Clinical research +/- Clinical medicine (patient care)? Corporate (Amazon? Google? On the health side)? As you know would like to/need to make money and need to find the right space next...
