Hi Jeffrey -

Just tried calling you to check-in. FYI below:

TWTR closes at \$44.90, touching a high of \$50.09 in the early morning flurry and retracing as high as \$48.66 late in the day.

Risk-off move across the markets today, as you likely saw (S&P down 1.3%, eurostoxx jumped and reversed post ECB, finishing down 44bps).

Refreshed pricing on the USDJPY 1yr risk reversal that we talked about at our meeting a couple weeks ago (ATMF/90 strikes) is 2.8% cost:

spot ref 97.75

Leg 1: Risk Reversal
<Client> buys Call, sells Put on USD/JPY in a Risk Reversal
Call Strike: 97.47
Put Strike: 90
Notional: USD 1,000,000 USD
Expiry: Mon 10-Nov-2014 (1y)
Settlement: Wed 12-Nov-2014
ZoneCut: NY
Net Premium Paid: USD 28,000 (2.8%)
Premium Date: Tue 12-Nov-2013

Indicative levels only. Subject to market movement. Source: DB WM FX Solutions, 11/7/13.

Classification: For internal use only

Keep in mind, none of these include markup so you will have to account for that

Risk Reversal selling 90 strike puts (23 delta) cheapens the long call by 1.38% vs the forward that gives you 1-for-1 downside exposure beginning at 97.84. We can change the downside strike to wherever the client is comfortable getting long USDJPY. The one year low in USDJPY has been 79.38

Leg 1: European Option Call
<Client> buys European USD Call on USD/JPY
Strike: 97.84 (atmf)
Notional: USD 1,000,000
Expiry: Tue 21-Oct-2014 (1y)
Settlement: Thu 23-Oct-2014
ZoneCut: NY
Premium: USD 41,000
Premium Date: Wed 23-Oct-2013

Leg 2: European Option Put
<Client> sells European USD Put on USD/JPY
Strike: 90
Notional: USD 1,000,000
Expiry: Tue 21-Oct-2014 (1y)
Settlement: Thu 23-Oct-2014
ZoneCut: NY
Premium: USD -13,830
Premium Date: Wed 23-Oct-2013

Kind regards,
Harlin

i'd favor less leverage with some protection (out of the moneyness) built in on the sold option. but would love your input

for how much in notional? ie how much leverage does he want?

Kind regards,
Harlin

How much do you think he's willing to spend in premium? I can solve for possible strikes.

Kind regards,
Harlin

The 1y forward points are pretty accurate on bberg.

The option struck atmf will cost around 4.10% of notional (no markup included) 1y volatility is around 10.3% at the moment.

It depends on how you look at it - if you are ok without the downside protection, I would do the forward. If the client is qualified to do forwards though, they could also explore a risk reversal to lower cost and give some protection in the event of a correction.

What type of client is it and what size are they thinking to do?

Kind regards,
Harlin
