thanks, i really appreciate it. 1. the island is only for me and the same guests , no more than 6 . the concept is privacy , peace and quiet. surprises are not surprises the 10th time. the spaces need their own character. it is only me that will walk the island 90 percent of the time. . I would like to think of it as having different experiences. . rock pool . cave? modern. ? high tech. . other robinson crusoe , but he gets old quickly? :). clean and easily maintained is another issue. there is nothing of any quality in the entire caribbean. thats why these two islands will be iconic. . they are the only private islands in us waters. most islands are in the bahamas. or bvi. . for good and for bad. we are subject to US codes. but under protection of us coast guard, , hospitals are within reach, and fed ex delivers. most islands needs boat rides and customs from the us. high speed internet is here, as st croix is the fifer hub . for us - africa. . the wind is the biggest environmental issue. the current main house pool is currently uselsss as the wind is usually too great to enjoy a calm swim. it is a hurricane zone and an earthquake zone. very unusual to have both. .
