 Milken Institute

 March 2016

 Francis Collins, Director, National Institutes of Health; Robert Califf, Commissioner, U.S. Food and Drug Administration; Tom Frieden, Director, U.S. Centers for Disease Control and Prevention; Michael Milken, Chairman, Milken Institute

The inaugural [Milken Institute Public Health Summit](#) – March 1-2 in Washington, D.C. – convened 500 leaders from government, universities, industry, research centers and philanthropy to focus on the most urgent topics in public health and help forge global collaborations to solve them. The first day, hosted at the [Milken Institute School of Public Health at George Washington University](#), centered on the role of public health schools. The second day featured dozens of panels, talks and private sessions on topics including chronic diseases, antibiotic resistance, big data, access to health services and aging.

CEO Michael Klowden told participants, “The goal of the Institute’s Center for Public Health is to do in the area of public health what [FasterCures](#) has done for medical research. We want to bring people together, spark ideas and insights, and help foster effective collaboration. We want to make prevention as important a priority as discovering cures.”

RESEARCH ON PUBLIC HEALTH ISSUES

The Price Women Pay for Dementia

Dementia presents a pernicious gender-based health disparity in the United States, inflicting a disproportionate burden on women as both patients and caregivers. Given the rapid increase in the population of older Americans, the number of women with dementia and those serving as informal caregivers will escalate and cost the economy a cumulative \$5.1 trillion through 2040.

Health and the Gender Gap

While it is known that socially determined circumstances create disproportionate obstacles for ethnic or racial minorities, women, and individuals with disabilities, the extent to which these factors influence health disparity is not well understood. This report delves deep into the data to get a better understanding of how to improve global health.

Lessons of the Millennium Development Goals

Did the United Nations' ambitious Millennium Development Goals improve the health of people in emerging regions of the world? In this paper, a discussion of the precursors of higher living standards and better health, Ken Sagynbekov focuses his data-driven inquiry on the effects of

the MDGs, adopted in 2000, on the maternal mortality rate, the under-5 mortality rate and HIV/AIDS prevalence.

INSIGHTS FROM INSTITUTE EXPERTS

Monetary Policy: What a Thrill

By [Jakob Wilhelmus](#)

Monetary policy seems to be left with a task that it is not, and actually never was, prepared to handle: solve all sorts of short-term economic problems. [More »](#)

Is This Any Way to Run a Railroad?

By [Brian Knight](#)

After the ruling of *Madden v. Midland Funding*, it was found that a non-bank entity that buys debt from a bank cannot enjoy the bank's interest rate preemption. Brian Knight examines the potential pitfalls for marketplace lenders. [More »](#)

Do We Really Need Helicopter Money?

By [Keith Savard](#)

In Japan and a few European countries, central banks introduced negative interest rates as an experiment in monetary policy. But, it might not stop there. Keith Savard predicts helicopter money, or disbursing cash directly to households, might be next. [More »](#)

ECON 101: Revisiting the Phillips Curve

By [Jakob Wilhelmus](#)

In her latest statement before the Senate Committee on Banking, Housing, & Urban Affairs, Janet Yellen, chair of the Federal Reserve, answered a question about the importance and use of the Phillips curve. [More »](#)

What a Donald Trump Presidency Would Mean for Asia

Featuring [Curtis S. Chin](#)

Curtis S. Chin, Asia fellow at the Milken Institute, discusses the Super Tuesday primary results, the candidates, China's National People's Congress and his outlook for China. He speaks to Bloomberg's Rishaad Salamat on "Trending Business." [Video »](#)
