dear Jeffrey

attached please find a proposal to your Foundation along lines discussed

regarding an article on transsexuals i suddenly realized that their novelty does not so much lie in new ways to be homosexual, bisexual, pansexual but in our ability to mold our phenotype—i.e. create our 'gender'

estrogen therapy softens the skin, gets rid of hair, curves the body—and causes impotence !

so yes if i were to quickly master this emerging bio/developmental literature i could perhaps say a word or two

all best

bob
