### **Beyond words.**

Twitter is for sharing standout moments. And not just with text. It lets you tell stories — as they happen — with photos. Our new photo features make sharing your pics a snap.

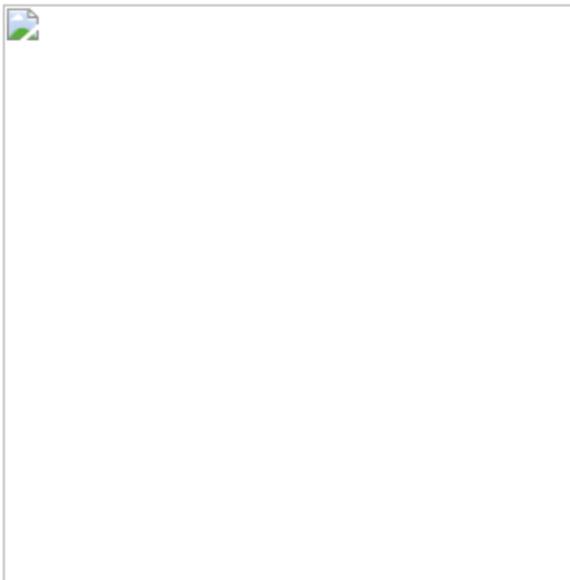

### **Show everything at once.**

Share multiple photos in the same Tweet. Simply tap the pics you want to include, and post.

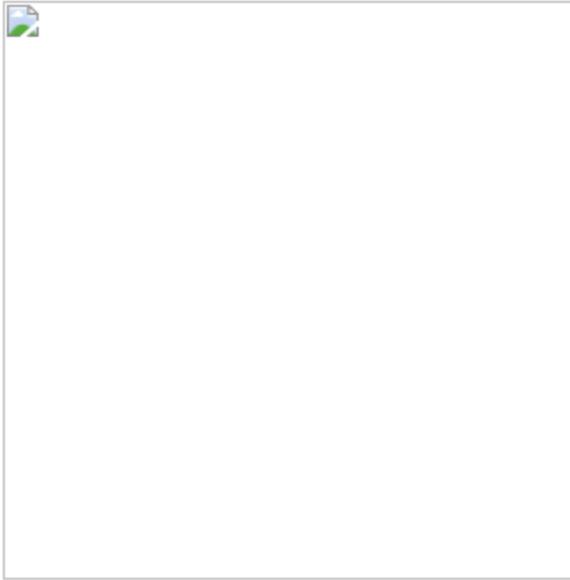

### **Introduce your friends.**

Tag people in your photos to bring them into the conversation, and show everybody who's who.

### **Change the mood.**

Add a filter from our library to enhance your photos. Make a pretty picture prettier. Make a cool picture cooler. Make every moment your own.
