---

Good Evening

FYI

Ion punch list

5 Palms - interior walls, ceiling, canvas frame, wood/gold work on pilers and shelves

Possible repair of damaged sculptors?

Sarah's Office - damage around light switches and a number of touch ups

All Guest Rooms - light switches, bathroom walls

Pool Cabana - review since furniture placement has changed, marks on wall?

Review outside faux stone work that was sealed please confirm that this was the correct sealing product and everything is holding up

Please review all areas noting the following

Relax bathroom - quite a bit of water came thru the sea facing door before it was sealed correctly

Desal/RO Paint work - does this theme need to be expanded into the new Mech area?

There are quite a few painting projects but I believe they do not justify Ion specialty work

Warmest regards
