Flag pole pool:

80% of the speakers are functioning with me cutting away at the wire to find sections that was not badly compromised by corrosion. The 4 speakers and two subs at the far end of the pool is what being problematic, but will continue to troubleshoot the situation and get them online.

In addition, I ran the theater for 30 minutes and did not see any buffering. I will do so again for longer interval to verify.

Regards  
Jruan
