

There's more to life than legwork

Introducing new tools to help you focus on
what matters most

Find what you need faster

According to a recent McKinsey report, today's workforce spends 61% of their time managing work rather than doing it. That's insane. So we've been hard at work redesigning the Dropbox website. In the coming months, we'll be rolling out a simplified Dropbox experience that makes navigation easy—so you spend less time scrolling and more time being a creative genius.

Grow bigger, brighter ideas

More than a doc, Dropbox Paper is a flexible workspace that brings people and ideas together. Today, Paper is out of beta and available in 21 languages on the web. Check out how Paper can help you with every phase of your project.
